Susan,

I agree with all of the sed/sw sampling locations.

Subject: surface water/sediment locations - Cabo Rojo

Buenos días Denise,

Based on our current knowledge of site conditions, we would like to propose surface water and sediment sampling at the locations shown on the attached figure. The locations are described on the attached spreadsheet, with the rationale for selecting each location. Once you approve these locations I will complete the paperwork requesting CLP or DESA to analyze the samples. We will probably collect the samples in September around the time that the multiport wells are completed. This week we are conducting geophysical testing in the bedrock boreholes and also collecting the wireline samples for the subcontract lab to analyze. I'll keep you posted on progress.

Susan
